### Portfolio Risk

Potentially lower rewards      Potentially higher rewards

Lower risk      Higher risk

The portfolio is in this category due to historic risk and return characteristics demonstrated in the performance simulation, alongside the expected growth asset range between 90% - 100%. A risk indicator of "1" does not mean the investment is risk free.

### Investor Profile

The portfolio aims to cater for retail or professional investors looking for a diversified portfolio to hold over the long-term, with a bias to growth assets, that are mostly equities. It aims for total returns that keep pace with/are ahead of inflation and as an equity focused portfolio, it is best suited to long-term investors.

### Portfolio Aim

To grow capital over the long-term by investing in a portfolio that is predominately invested in equities.\*

\*There is no guarantee this objective will be met. Capital is at risk.

### Portfolio Characteristics

The portfolio will predominantly be made up of open-ended multi-asset funds investing across asset classes, although funds investing in single asset classes, such as fixed income or equities, can be used.

The portfolio will be invested in a range of passively and actively managed funds, although there will be a bias to passively managed investments.

### Performance Update\*

The portfolio inception date was 30 November 2024. **Performance will show here, once the portfolio has record a full 12-month track record.**

### Market and Portfolio Update

More than half the world voted in 2024, leading to many leadership changes. This will have significant impact for policy, tax and society as a whole in 2025. Last year saw US economic growth remain strong but anaemic in most other regions. Inflation was subdued but the embers still burn. Bonds didn't do much in 2024, but appear better placed for 2025. Within equities, US markets had another stellar year – boosting portfolio returns – but history suggests a change of market leadership is due. 2024 was a year of political change and the effects will filter through to societies and the wider global economy in 2025. It was also a year where geo-political tensions continued to rise and sadly a de-escalation does not seem imminent.

The four funds held in the portfolio each have their own unique investment style, these are: 'Passive' - which has a long-term static asset allocation approach; 'Passive & Tactical' - where value can be added by implementing shorter-term tactical asset allocation decisions; 'Passive & Factors' - the value, smaller companies and profitability (quality) factors are emphasised; 'Active' - an actively managed fund seeking to deliver outcomes superior to that of wider markets.

## Asset Allocation

Below is a list of holdings in the portfolio\*, alongside a summary and allocation weighting:

\*For illustrative purposes only. Actual exposures may vary according to manager discretion. An allocation to cash may also be included.

- Passive
- Passive & Tactical
- Passive & Factors
- Active

Fund Name	Overview	Allocation
Vanguard LifeStrategy 100%	A low cost passive based investment solution that provides exposure to a static portfolio of 100% equities. The fund invests in thousands of stocks worldwide, although there is a bias to the UK to reflect where its investors are based. The key benefits of the strategy are its ability to lower risk through diversification and deliver returns that are comparable to global markets. Additionally, the fund is managed on a daily basis in order to maintain its specific asset allocation.	30.0%
HSBC Global Strategy Adventurous	A low cost passive based investment solution that is actively managed in order to take advantage of opportunities and avoid risks, as they are uncovered. The fund invests in a diversified portfolio across various asset classes, including equities, bonds, and other asset classes. The main advantages of the fund are its ability to add value through active management and deliver this in a highly cost-effective manner.	30.0%
Dimensional World Equity	A fund investing approximately 100% in equities. The strategy is tilted to areas of the market that the firm's rigorous and long-term focused research has identified as offering higher expected returns. This includes tilts to value (companies undervalued by the market), profitability and smaller sized businesses.	30.0%
Wellington Global Quality Value	A strategy investing in equities and actively managed by Wellington Management, a firm with a deep heritage of investing. The portfolio is tilted to value stocks with a quality bias, aiming to deliver outperformance of global stock markets with lower levels of risk. The process also incorporates sustainability criteria, including a net zero commitment by 2050.	10.0%
