

# CONSERVATIVE MULTI-STRATEGY PORTFOLIO

## Key Information

Inception Date: **30 November 2024**

Base Currency: **GBP**

Minimum Investment: **Platform dependent**

Available Share Class: **Accumulation**

Historic Yield: **1.43%**

Accessibility: **GIA, ISA, PP, SIPP**

Number of Holdings: **4**

Growth Assets: **40.0%** (Range\*: 30% - 50%)

\*Expected range. Actual allocation may be more or less than this.

## Portfolio Charges

Initial Charge: **0%**

Portfolio Management Fee: **0.15%**

Ongoing Cost of Funds (OCF): **0.26%**

**Total Portfolio Cost: 0.41%\***

\*A professional adviser's initial and ongoing charge may be applied, subject to agreement between client and adviser. Other charges (such as platform charge) may also apply. OCF figure will vary.

## Portfolio Risk

Potentially lower rewards Potentially higher rewards

Lower risk Higher risk

The portfolio is in this category due to historic risk and return characteristics demonstrated in the performance simulation, alongside the expected growth asset range between 30% - 50%. A risk indicator of "1" does not mean the investment is risk free.

## Investor Profile

The portfolio aims to cater for retail or professional investors looking for a diversified portfolio to hold over the long-term, with a bias towards defensive assets. It aims for total returns that keep pace with/are ahead of inflation and which are less volatile than investing solely in equities.

## Portfolio Aim

To grow capital over the long-term by investing in a diversified portfolio, with a bias towards lower risk asset classes, such as cash, fixed income and alternative investments and investments in higher risk assets, which are mainly equities.\*

\*There is no guarantee this objective will be met. Capital is at risk.

## Portfolio Characteristics

The portfolio will predominantly be made up of open-ended multi-asset funds investing across asset classes, although funds investing in single asset classes, such as fixed income or equities, can be used.

The portfolio will be invested in a range of passively and actively managed funds, although there will be a bias to passively managed investments.

## Performance Update\*

The portfolio inception date was 30 November 2024. **Performance will show here, once the portfolio has record a full 12-month track record.**

Cumulative Performance	1m	3m	6m	1y	3y	5y	YTD
Conservative Multi-Strategy	-	-	-	-	-	-	-
ARC Cautious	-	-	-	-	-	-	-

\*Net of underlying fund costs and a 0.15% annual management fee. Other costs may apply.

## Market and Portfolio Update

The Easter bunny had a busy month delivering President Trump's tariff shaped eggs around the world. These proved too sour for markets, prompting a 90-day pause. At present the international trade outlook appears bleak – though more positively some wheeling and dealing has begun. US stocks have floundered, while European stocks have triumphed in 2025. The EU is stirring, with spending on the rise; sometimes, the sleepy bloc needs a wake-up call to spring into action. It may be some time until the international trade situation becomes clearer; it is already causing supply chain issues and headaches for businesses. Trade between the US and China has effectively come to a halt. There are some tentative signs that negotiations are progressing. Nevertheless, the reputational damage to brand USA is significant, and the capital inflows the nation has enjoyed in the last decade, may now spread to the rest of the world.

The four funds held in the portfolio each have their own unique investment style, these are: 'Passive' - which has a long-term static asset allocation approach; 'Passive & Tactical' - where value can be added by implementing shorter-term tactical asset allocation decisions; 'Passive & Factors' - the value, smaller companies and profitability (quality) factors are emphasised; 'Active' - an actively managed fund seeking to deliver outcomes superior to that of wider markets.

## Asset Allocation

Below is a list of holdings in the portfolio\*, alongside a summary and allocation weighting:

\*For illustrative purposes only. Actual exposures may vary according to manager discretion. An allocation to cash may also be included.

- Passive
- Passive & Tactical
- Passive & Factors
- Active
- Cash

Fund Name	Overview	Allocation
Vanguard LifeStrategy 40%	A low cost passive based investment solution that provides exposure to a static portfolio of 40% equities and 60% fixed income. The fund invests in thousands of stocks and bonds worldwide, although there is a bias to the UK to reflect where its investors are based. The key benefits of the strategy are its ability to lower risk through diversification and deliver returns that are comparable to global markets. Additionally, the fund is managed on a daily basis in order to maintain its specific asset allocation, ensuring its risk profile remains consistent.	29.5%
HSBC Global Strategy Conservative	A low cost passive based investment solution that is actively managed in order to take advantage of opportunities and avoid risks, as they are uncovered. The fund invests in a diversified portfolio across various asset classes, including equities, bonds, and other asset classes. The main advantages of the fund are its ability to add value through active management and deliver this in a highly cost-effective manner.	29.5%
Dimensional World Allocation 40/60	A fund investing approximately 40% in equities and 60% in fixed income. The equity allocation is tilted to areas of the market that the firm's rigorous and long-term focused research has identified as offering higher expected returns. This includes tilts to value (companies undervalued by the market), profitability and smaller sized businesses. Within fixed income, the team actively manage the credit quality of the portfolio and its sensitivity to interest rates, looking to increase returns and reduce risks depending on market conditions.	29.5%
Vanguard ActiveLife 40-50% Equity - Managed by Wellington	A strategy investing between 40% and 50% in equities, with the remainder in fixed income assets. The fund is actively managed by Wellington Management, a firm with a deep heritage of investing who have been delivering multi-asset portfolios in conjunction with Vanguard since 1975. The equity portion is tilted to value stocks with a quality bias, aiming to deliver outperformance of global stock markets with lower levels of risk. The fixed income investments are in investment-grade securities and designed to dampen overall portfolio volatility. The process also incorporates sustainability criteria, including a net zero commitment by 2050.	10.0%
Cash	Cash	1.5%
